SUMMARY

Dedicated and motivated undergraduate pursuing a BSc (Hons) in Computer Science at University of Westminster, with a strong passion for web development and software engineering. Possesses a solid foundation in programming languages including Java and Python, along with modern web technologies such as HTML, CSS, JavaScript, React.js, and Next.js. Demonstrates strong analytical thinking, problem-solving abilities, and a commitment to continuous learning. Eager to apply academic knowledge and technical skills in practical, real-world environments while further developing expertise in full-stack and modern web application development.

TECHNICAL SKILLS

- Programming Languages: Python, Java, JavaScript
- Frontend Development: HTML5, CSS3, JavaScript, React.js, Next.js, Responsive Web Design
- Mobile Application Development: Flutter
- Computer Vision & Image Processing: OpenCV
- Database Management: MySQL, SQL
- Networking: IP Addressing, Basic Network Configuration, Network Fundamentals
- UI/UX & Design Tools: Figma (Wireframing, UI Design, Prototyping)
- Development Tools & Platforms: Git, GitHub, Vercel, Version Control, Web Application Deployment

PROJECTS

Adorix – AI-Powered Conversational Sales Kiosk | 2025 – 2026

🔗 <https://github.com/ADORIX000>

- Developed an AI kiosk that detects shoppers and displays targeted video ads in real time.
- Integrated face tracking and age/gender detection with a voice-activated chatbot for customer Q&A.
- Tech: Python, OpenCV, FastAPI, React.js, Tailwind CSS, WebSockets, Supabase

SMART TAIL POD – IoT-Based Cattle Heat Detection System | 2026 - ongoing

- Developing a smart IoT device to detect heat signs in cattle for better artificial insemination timing.
- Building a wearable sensor system to monitor cattle activity and temperature.
- Creating a mobile and web application for heat alerts and cattle monitoring.
- Tech Stack: ESP32, IoT Sensors, Python, React.js, Firebase, JavaScript.

WordSearch App – Interactive Puzzle Game | 2026

🔗 https://github.com/BinethmaJayawickrama/word_search_app

- Developed a multi-level puzzle game with a dynamic grid generator for infinite replayability.
- Implemented smooth touch-drag selection logic and a tiered difficulty system (Easy to Hard).
- Integrated real-time timers and star-based scoring to track player performance.
- Tech: Flutter, Dart, Material 3, Git, Android SDK

ApexFled – Premium Digital E-Commerce Platform & Account Store | 2026

🔗 <https://github.com/SithikaWeerasinghe/digital-account-store>

- Developed a high-performance e-commerce platform with automated, instant digital product delivery and a custom cart management flow.
- Engineered a full-stack user reviews and ticketing system, including a secure admin dashboard powered by a custom Supabase server client that bypasses Row Level Security (RLS) safely.
- Tech: Next.js (App Router), React.js, TypeScript, Tailwind CSS, Supabase (PostgreSQL), REST APIs

Vision Brightness Sync – AI-Powered Gesture Brightness Controller | 2026

<https://github.com/BinethmaJayawickrama/vision-brightness-sync>

- Built a high-performance Windows system utility utilizing computer vision to dynamically control screen brightness via hand gestures.
- Implemented a distance-independent tracking framework using hand-pose estimation to calculate relative pinch ratios, incorporating edge-snapping and frame-skipping optimizations for minimal CPU overhead.
- Tech: Python 3.12, MediaPipe Tasks, OpenCV, NumPy, screen-brightness-control

EDUCATION

BSc(Hons) Computer Science <i>Informatics Institute of Technology, Sri Lanka University of Westminster, London</i>	2024 - Present
G.C.E Advanced Level Examination <i>Kalutara Balika Vidyalaya, Kalutara</i>	2023
G.C.E Ordinary Level Examination <i>Ananda Balika Vidyalaya, Colombo 10</i>	2020

EXTRACURRICULAR ACTIVITIES

- IEEE Computer Society Member (2024 – Present)
- RACIIT Member (2024 – Present)
- Carrom: Member of the university team
- Volleyball: Represented the school team
- Science Society Member: Participated in science activities and presentations
